- Statement Regarding Fed sponsored R & D
Unknown
- Reference to Microfiche Appendix
NONE
- Background of the Invention
Unknown
- Brief Summary of the invention
Video streaming real estate for sale, rent, lease etc. with sound on a Global Computer Network, to the Real Estate Office for clients to view. Exclusively for Realtors to be used as a marketing tool.
- Brief Description of the Drawings (if filed)
NONE
- Detailed Description
The development of our one of a kind marketing tool has been customized and designed to be the only service providing video streaming of real estate along with sound on a Global Computer Network. Our service has also taken the dedication to display the dimensions of each room of the property on the screen for the clients to view along with a floor plan of the property.
Real Estate Video Service is a marketing tool to be used by Realtors, to provide convenience to their clients to view the inside and / or outside of real estate without the time consumption of traveling, unless chosen to do so.
